YOUR DIRECT LINE TO A CLINICAL PHARMACIST

Your medication questions answered by a Blue Cross® and Blue Shield® of Vermont Pharmacist

Our board-certified clinical pharmacists help you navigate your patient's specific needs when it comes to their medications and are standing by to answer a broad range of questions.

Our pharmacists:

- Work directly with providers to support patient-specific clinical decisions
- Provide additional educational presentations, quick reference guides, patient panel reports and more
- Help communicate between you and a BlueCross Vermont member to meet their medication needs
- Will send you information when a medication coverage change happens for your patient

Reasons to reach out:

1. Ask about drug coverage, prior authorizations, or a clinical drug information question!

Common questions are:

- What drugs are covered for this condition?
- Does this require a prior authorization?
- What is a lower cost option?

2. Schedule a time for a FREE 1 hour continuing education session with a pharmacist. This is for all clinical care providers and our way to help complete your education credits and help patients. Most recent topics include:

- Asthma Treatment Updates and Improvement Initiatives
- Safe Use of Stimulants in Primary Care

It's easy to contact a BlueCross pharmacist. Call, email or fax!

Amy Stoll

PharmD, MPH, CDCES, BCACP

Clinical Pharmacist – Provider Education, Outreach and Support

To schedule a free continuing education session or ask drug coverage questions:
