

# PREVENTIVE CARE GUIDE

**BlueCross BlueShield**  
of Vermont

An Independent Licensee of the Blue Cross and Blue Shield Association.

## PURPOSE OF THIS GUIDE

We created this guide to help you understand your plan's zero-cost preventive care benefit. This guide explains:

- Preventive care available at no cost to you; and
- Billing information your provider may need to report your preventive care.

Some of the language found within this guide is technical. We hope that by providing you with the types of care covered by your preventive benefit, you will be able to get the most from your plan. We also hope this will be a useful tool for your providers.

## RECOMMENDATIONS FOR PREVENTIVE CARE BENEFITS

The Affordable Care Act and Vermont state mandates define your plan's zero-cost preventive benefit. Your preventive services are eligible at no cost to you when they align with the recommendations of four expert medical and scientific bodies:

- The United States Preventive Services Task Force (USPSTF) list of A- or B-rated services;
- The Advisory *Committee* on Immunization Practices (ACIP);
- The Health Resources and Services Administration's (HRSA) infant, children and adolescent preventive services guidelines; and
- The Health Resources and Services Administration's (HRSA) women's preventive services guidelines.

The experts listed above provide guidance and research to determine the most effective care for national population health. This means that your plan covers services that most of the public needs at no cost to you. We also include Vermont state mandates, as required.

Some services require prior approval. You may review our prior approval requirements online at <https://www.bluecrossvt.org/providers/prior-approval-authorization>.

## FOR MEMBERS

When the care you receive falls outside of the zero-cost preventive definition listed above and the services and codes outlined in this document, you may pay cost-share (such as deductible, co-insurance, or co-payments) like you would for any other service.

## FOR PROVIDERS

ICD-10-CM Codes in **bold** denote codes that, according to proper coding convention within the International Classification of Diseases, may only be reported as the principal/first-listed diagnosis. Please see your ICD-10-CM manual for clarification and additional instructions. Procedure codes listed may come from Current Procedural Terminology (CPT®) or Healthcare Common Procedure Coding System (HCPCS). Diagnosis codes indicated are from the 10<sup>th</sup> edition of the International Classification of Diseases (ICD-10-CM).

Current Procedural Terminology (CPT®) or Healthcare Common Procedure Coding System (HCPCS) codes in **bold** are combination vaccines containing at least two toxoids. All vaccines listed are eligible with no diagnosis code requirements.

Claim editing logic applies and supersedes all coding provided in this document.
